BLUE SEA SYSTEMS®

m-, e-, and HD-Series Battery Switches

Blue Sea Systems® e-series, m-series, and HD-series battery switches are simple to install, easy to use, and have a high quality aesthetic design. Various style and selector options are available in each featured series, including Dual Circuit Plus™ for simplifying switching needs. These battery disconnect and selector switches meet UL 1500 and SAE J1171 requirements for external ignition protection. The design of the case allows for surface, rear, or front panel mounting options.

FEATURES & BENEFITS

- Protected with an IP66 rating against powerful water jets
- Current ratings available from 300-600A
- Isolating cover with snap-on sections protects rear contacts
- Make-before-break contact design allows switching between battery banks without power interruption
- Accepts up to 4/0 GA battery cable
